

The diagrams below give information about the Eiffel Tower in Paris and an outline project to extend it underground.

Write a report for a university lecturer describing the information shown.  
You should write at least 150 words.

| EIFFEL TOWER               |               |
|----------------------------|---------------|
| Height:                    | 324m          |
| Weight of metal structure: | 10,100 tonnes |
| First platform:            | 57m           |
| Second platform:           | 115m          |

- First level**  
Ticket office and access to tower
- Second level**  
Shops and restaurants
- Third level**  
Cinema and museum
- Fourth level**  
Parking
- Fifth level**  
Parking
